Base Ball Games.

Onaway ball tossers played a return game on the local diamond Sunday afternoon with Walther Leaguers. The score 11 to 1 looks rather lopsided, but it was a fairly good game, nevertheless. A feature of the game was Ed Meyer's home run. A good-sized crowd was at the game, including a contingent of rooters, which came with the visiting team. Walther League line-up—

Walther League line-up: E Meyer c, R Enders p, P Enders lb, O Oppert-hauser 2b, O Miller 3b, H Staub ss, L Enders lf, W Ulmer cf, J Biedend-wien rf, A Enders rlf. Umpire—O Fuhr.

Walther Leaguers play at Holborn Friday afternoon.

Basketball Notes.

Stony Plain Senior Ladies' basket-ball team defeated the visiting Bright Bank squad on Saturday last in a very fast game at the local High School courts. Although the score was close, 20 to 15, Stony girls outnumbered the visitors in shots, 4 to 1; but they just could not click. Stony drew 7 penalties, while Bright Bank got but 1. Ph Enders are refereed.

Stony's line-up, with goals scored by the player: I Zucht 6, M Paller 6, R Leeder 2, R Fischer 4, M Campbell 2, E Fuhr 2, B Michael—20.

Bright Bank line-up: B Zahn 6, D Muldenhauser 5, B Bauer 4, F Dickie, J Fryer, G Summerfield, L Snyder—15.

The Stony Ladies' team are looking for a return game with the Grove's High School team.

Didn't Want 'Em.

The gramophone salesman was praising his machine to a prospect, and explaining they were exceptionally good reproducers. "Well," said the prospect wearily, "maybe they are; but who wants a lot of little gramophones running around the place?"

Barn Dance, Edmonton Beach, Saturday, June 16, 8.30 p.m.

Service Garage, - Stony Plain.

Stony Plain and District.

Miss Mary Carmichael left this week to spend the summer months with friends at Sydney, Cape Breton.

Mr Walter Carmichael is expected back this week from a short holiday spent with Mr F L Tilson on the latter's farm near Lamont.

Mr C G Singer took a party of friends down to Elk Island Park on Sunday.

Messrs Adolph and Emil Mittlestead made a motor trip over the week-end to Hay Lakes, their old home town.

Dr Webster, dentist, paid Stony a visit last week. The doctor was formerly a resident of Stony 'way back in '07, when freighters and camp followers were in evidence hereabouts. The doctor noted the many improvements that have been made here since he left.

While running bases in a practice ball game last week, Mr Solby Grant had the misfortune to have his left leg injured. The injury kept him from participating in the return game Onaway played on the local diamond Sunday.

On a hurry up call to participate in the boxing tournament in Edmonton on Friday night, Donald Carmichael was pitted against Jimmy Collier in the last bout, with the latter "getting the nod from the judges."

The work of demolishing the old C. N. Ry. station on Main St. was begun on Saturday. A work gang from Edson had the job in hand, and the lumber taken to Edson. The former tenant, Mr Sam Greko, moved up the Slaughter House trail.

Mr and Mrs Reed, Edmonton, were Sunday visitors at the home of Mr and Mrs Wm Kelly.

Departmental exams. commence tomorrow at the local High school.

The local branch of the Catholic Women's League met at the home of Mrs W Kelly on Friday evening, with Mrs Callahan presiding.

Dominion Day at Stony.

A bunch of good sportsmen are making an effort to have the town make a come-back on the big Dominion Day sports which once was so widely known and so well patronised. Those making the effort are to be commended for their enterprise and should receive every assistance possible from the citizens. A program is being planned which will include a baseball tournament, a basketball contest, a horseshoe match, and races for the younger ones.

The date, Monday, July 2d, so far, appears to be open, as the other nearby sporting events which may have clashed with this are now billed on other dates, notably the sports day at Onaway June 15; the Duffield picnic June 23; and the Holborn Anniversary on July 4th.

Quick Relief Now From Neuralgia

Real ASPIRIN Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest safe relief, it is said, yet discovered.

These results are due to a scientific discovery by one of the Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain in a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly as you swallow it. And thus is ready to go to work almost immediately.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN, look for the name Bayer in the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

Gold Still Is King

The lure of gold continues to exercise its sway upon the minds of men. Countries may go off the gold standard. New economists may argue, as they will, against gold as a monetary basis. Despite all the argument "about it and about", the yellow metal still casts its potent spell, alluring men to brave hardship and danger in its quest, impelling men to undertake hazardous expeditions to win it, inducing countries to exert desperate efforts to acquire it. Mirage or otherwise, it glides the horizon of new profit and old greed, of poet and peasant, of rich and poor, of commoner and peer. Phantasm or reality—gold still is King.

These somewhat worn-out platitudes are evoked by the recent appearance in a financial journal, of two items on gold which, strangely enough, were placed in close proximity. The one was headed: "Nations still scrambling for gold", and the other "£300,000,000 Buried by Pirates Sought". The one article demonstrated the hold which the gold tradition has upon world statesmen; the other epitomized the ingenuity and risk employed and undertaken in efforts to win the precious metal—a gamble with life and money.

Relative to the international scramble, it is stated that, Britain and other non-gold-standard countries, including the United States, of course, are buying gold wherever it can be bought, and that their accumulations of gold now break all previous records.

Replying to the question why the United States continues to purchase gold, the New York Times recently replied that, in principle at least, gold still remained the world's monetary standard. Continuing it said:

"No government is abating its monetary policies in line with the dreams of the imaginative New School Economists. Every government is recognizing the paramount necessity of return to a stabilized basis of international valuation. Nothing has shown this underlying sentiment more clearly than the fact that every nation—even those which have suspended gold payments—insisting the gold reserve against the central bank note issue. The United States has shown this underlying sentiment more clearly than England, at the beginning of 1933, held the smallest gold reserve in more than a dozen years. It has subsequently added nearly \$300,000,000, bringing the total to the figure in its history. . . . The general process is indirect recognition of the gold standard. The possession of adequate and concentrated gold reserves would unquestionably be of high value whenever return of sound international conditions should make return to sound and stable currencies a possibility."

The other story is somewhat similar to the famous Cocos Island treasure hunt. It refers to a projected expedition from Britain to Tahiti in the south Pacific, to reclaim approximately "£300,000,000 in gold ingots and a fortune in jewels", said to have been buried by pirates in or about 1849. Usually such treasure hunts originate with discovery, in some peculiar manner, of a map of the cache. Such a map Stevenson introduced in his "Treasure Island"; such a map as allegedly may have been found tattooed on the chest of some old sailor in some Barbary Coast "dive". In this particular instance, the map came into possession of an Australian in 1900, who, it is said, visited the island and succeeded in removing some of the jewels. These, he subsequently buried—a peculiar enough action for which no reason is given. However, in March 6, 1934, the same gentleman claims to have located the treasure at the exact point indicated by the map. Speaking of the discovery, he says:

"There are only two things to contend with in drilling for the loot—sand and coral. The drill went down through the sand, ground its way through the rough coral and rested on the gold. There is no rock off Tahiti and by the drill we felt out the shape of the ingots and also are able to determine the extent of the treasure. The drills spin on gold just as they would on a marble floor."

It is upon such evidence and such representations, apparently, that hard-headed British engineers and business men are prepared to risk their money, and expend their enterprise.

Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint, or any Looseness of the Bowels, take time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

The above complaint remedy has been on the market for the past 38 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side.

The Great Zambesi Bridge.

Remarkable Feat Of Engineering In Heart Of Rhodesia

Spanning the Zambesi, Gorge stands one of the highest bridges in the world. This bridge is in the heart of Rhodesia, far from civilization and so near to the great Victoria Falls that trains crossing the bridge are sometimes held up by spray from the turbulent water. The building of the Zambesi Bridge was a marvellous feat of engineering. First of all a rocket had to be fired across the rocky chasm. The rocket was attached to a line, which in turn was fastened to a length of wire and a steel rope.

During the construction of the bridge the builders worked at a dizzy height over the swirling waters below. When workmen began their task a large net was spread beneath them to prevent catastrophe, should any of them lose their balance.

But instead of steadying their nerves they complained that the net served only as a constant reminder of their perilous position, and so it had to be removed. After a period of little more than six months the bridge was completed and a train travelling at fifteen miles an hour was driven across to test its strength. The structure was painted grey so that whenever the materials rusted in any part the defect would immediately be noticed. This impressive feat of engineering in the wilds in no way detracts from the beauty of the scenery.

Harbor Expert Dead

Sir Frederick Palmer Who Recommended Churchill Was Noted Engineer

News reached Canada recently of the death at Lingfield, near London, England, of Sir Frederick Palmer, an engineer whose recommendation caused Churchill to be developed as Western Canada's northern sea outlet.

When Hon. C. A. Dunning assumed the portfolio of minister of railways in the Dominion cabinet in 1926, he sent to England for Sir Frederick, one of Britain's most noted engineers.

Sir Frederick went into the northland and after an extensive investigation, recommended to Mr. Dunning that Churchill be the northern port instead of Nelson.

The recommendation was acted upon, and Churchill became the outlet to the world for Western Canada, via the sea. For many years Sir Frederick was chief engineer of the Port of London Authority. He served as consulting engineer for many railways both in the old country and India, in addition to being engineer of the Calcutta port. In 1929 he was named engineer for the new £62,000,000 Charing Cross bridge, London.

Recipe For Iced Tea

Use six heaping teaspoons of "Salada" Black Tea. Brew tea in one pint of freshly boiled water for five minutes. Strain, and pour liquid into a two quart container. While hot, add 1½ cups of granulated sugar and juice of 2 lemons. Then shake or stir contents well, until sugar is fully dissolved. Fill container with cold water. Do not allow tea to cool before adding the cold water. Other wise liquid will become cloudy. This is now ready to serve in tall glasses with chopped ice or cubes. A slice of lemon may be added if desired. The above will make two quarts of iced tea, or seven tall glasses.

Soldiers Stayed In France

Over Thousand Americans Married And Made Home There

More than fifteen years after the bugles blew "cease firing," about 1,100 American veterans of the World War linger in France. Most of them are "voluntary exiles" for the sake of French wives. Their numbers are dwindling, however, for in 1931 they were 1,700 strong, figures gathered by the American Legion Post show. More than half live in Paris; the rest are spread over forty-nine departments.

It is now possible to determine the speed of lightning by use of special photographic apparatus. Experiments of this kind recently revealed that the average speed of lightning is about 28,500 miles per second.

Martyr To Radium

Last Of Scientists Who Aided Mme. Curie Is Dead

Henry T. Koenig, 42, a chemist of Denver, Colorado, who had worked for years under a self-imposed death sentence, died a martyr to his research work in radium.

Koenig was the 20th to die of the 20 scientists who aided Mme. Curie, discoverer of radium, in her research work.

One by one, Koenig's companions died from malignant infection induced by contact with the mineral. But he continued his work, although he knew that each contact further weakened his system. Through his work and that of his companions thousands have been given relief.

Koenig's work in perfecting a system whereby radium extraction could be accomplished at a lower price than ever before was recognized by authorities as one of the greatest contributions to medical science.

He studied the rich radium ores of the Belgian Congo in 1922 and 1923. His development of the ores in this region remedied all danger of a monopoly in radium.

During the World War he adapted radium to practical use in warfare. The use of radium for the illumination of watch dials at night was the result of his research.

Three months ago he was ordered to Porter's Sanitarium, suffering from cancer of the hip. Treatment failed to check the disease and he died.

Irrigation Plans

Proposal To Irrigate Large Block Of Land In Southwest Saskatchewan

Irrigation for between 6,000 and 10,000 acres in southwest Saskatchewan is proposed in a plan to be urged before the Saskatchewan government.

Facing a feed shortage for the third successive year, farmers around Valmarie and Cadillac ask \$100,000 expenditure to build a dam on the Frenchman river with a 15-mile main ditch south and east through Foot-hills.

Alfalfa would be sown with two crops a year, providing a likely crop of 25,000 tons or enough to feed 20,000 cattle.

An experimental dam is being built by George Newton to serve his farm a few miles west of Valmarie.

J. R. Reid, Regina, is doing the engineering work. A small dam is being built at the Frenchman river, pump installed, and the scheme designed to supplying about 260 acres.

Mr. Reid said that with two crops a year about 1,250 tons of alfalfa can be grown, sufficient to feed 1,000 cattle.

Fraudulent Stock Promotions

Government To Put Puk Stop In Work Of High-Pressure Salesmen

The House of Commons took the first step recently to spook the work of high-pressure stock salesmen when it reviewed the Consolidated Companies Act which practically remodels the laws governing company formation.

Designed to stop fraudulent stock promotions, the bill would make it impossible to sell promotion stock except through a prospectus, approved by the secretary of state. Among other provisions, fines and imprisonment would be established for any house-to-house stock canvasser or any organization that used a telephone and sucker list to promote sales. Penalties would range from \$500 for a first offence to \$1,000 and a year in jail for subsequent convictions.

Willing To Co-operate

"Woman is very unreasonable," said a venerable New Hampshire justice of the peace. "I remember that my wife and I were talking over our affairs one day, and we agreed that it had come to the point where we must both economize. 'Yes, my dear,' I said to my wife, 'we must both economize, both.' 'Very well, Henry,' she said, 'with a tired air of submission, 'you shave yourself, and I'll cut your hair.'"

Fifty years in which to pay costs of the court, totalling \$750, has been given to an unsuccessful litigant, Bernard Kelly, a dock laborer in Liverpool.

Hero Of Russo-Japanese War

Admiral Togo, Who Died Recently, Was Idol Of Japanese People

Admiral Marquis Kelmachiro Togo, the silent little man whose destruction of the Tsar's Russian fleet 29 years ago placed Japan among the great powers, died at Tokyo recently.

At the age of 86 and with the rank of Japan's greatest hero, he surrendered to cancer of the throat.

Admiral Togo was the last and most illustrious of all the heroes of the Russo-Japanese war. For several weeks he had been seriously ill. The day before he died the emperor elevated the aged sea hero from the rank of count to that of marquis. Posthumously he was promoted to admiral of the highest court rank.

Episode Of Cotton Trade Shows That Museums Often Render Vital Service To A Nation

The cotton manufacturers of Lancashire, England, have endeavored to the British government seeking official intervention to protect the cotton trade against the competition of Japanese textiles. Paradoxically, Lancashire has been the mother of the ardent free trade school which was put under eclipse by the present government.

This is not the first time that the English cotton trade has felt the sting of competition of foreign manufacturers. An example of such a contest was cited recently in Toronto by Dr. C. T. Curdell, director of the Ontario Museum attached to the University of Toronto. In this instance the field of battle stretched down the entire coast of Africa.

It was about the turn of the present century. The British cotton trade in Africa flourished. The heads of German museums, well supplied with money, launched on an extensive tour of several months' duration down the African coast.

The native African was something of a weaver. In his primitive way, every pattern that he wove with his African grass had a meaning. This pattern was a prayer for rain. That one was a prayer that would keep the evil spirits away from the baby at night. So design was everything. What did our German museum men do? They visited every tribe on the west coast and they acquired a sample of every pattern woven by the natives. The scouts returned to Germany with an enormous variety of samples of African weaving. "Come and see," they said to the textile manufacturers of the Fatherland. They not only came and saw—they copied. Soon German ships were carrying African patterns in German cloths back to the tribes on the west coast.

It was a hard blow to England. Almost overnight 75 per cent. of the British cotton trade in Africa was wiped out. Germany made phenomenal progress at Britain's expense. Only in the past few years, after a quarter of a century, has the African showed any tendency to return to the British product.

Dr. Curdell's recitation of this episode of the cotton trade was given, of course, to demonstrate the vital service that museums can render to a nation. Most of us have had the idea that a museum is a place to house ancient relics for the amusement of those who study the past because the present is too fast for them. Anyone who has had the privilege of spending an hour or so with Dr. Curdell will know that a good museum means with information of tremendous value to an industrial nation. He will also know that the director of a good museum is a man who knows the wide world as few people know it, a man who knows so much about the old world that he knows a tremendous lot about why the present world is what it is.

No, museums are not so dead, after all.—Stratford Beacon-Herald.

Uptrend Held Unlikely

Hardly Possible World Wheat Price Will Advance Greatly

The Financial News considers the possibility of a world uptrend in prices was improbable. "It is possible," it said, "that a large part of the responsibility for the low level of world prices is to be found in the fear that on any breakdown of the wheat agreement the United States would dump her surplus of over 200,000,000 bushels abroad.

"Removal of these fears might cause a much more buoyant tendency, otherwise no outstanding, sustained strength in the international market could be assumed to result from American crop damage such as appears to be at present. In America itself, however, a reasonable rise in the prices of grains seems likely to be maintained."

A deaf and dumb person who is fairly expert at finger language can speak about 43 words a minute.

W. N. U. 2050

Cuba's Cattle Dogs

Visitors To Island Amazed At Cleverness Of Animals

Sheep-dogs are world-famed for their devotion and intelligence; but have you ever heard of cattle-dogs? Visitors to Cuba are amazed at the cleverness of these dogs of the island. In some of the ports animals that are brought from the American continent cannot be landed directly on the shore. The steamer is taken as near shore as possible and the cattle must swim to land.

To show the animals the most direct route, specially trained dogs are employed. Beside each animal one of the dogs swim, pushing the creature with their noses just behind its ears.

As soon as the beast's feet touch the bottom, and the dogs feel that their charge is safe, they at once return to the ship to bring in another one. This clever dogs will do again and again without receiving any orders from their masters.—Our Dumb Animals.

By Ruth Rogers

SMART! IT'S CRINKLED WHITE LINEN—RED STRIPES—RED TIE AND RED BUTTONS

MADE AT SAVING

You'll love this smart little sports frock. It follows modes whim in gray stripes.

It's fashioned so quickly, too. Fresh cottons are also attractive for it as striped or checked neerucker, shirting cottons, pique, challe tie prints, etc.

Tub pastel silks and linen are other smart suggestions. Style No. 594 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust.

Size 16 requires 3 1/4 yards of 39-inch material, 1/4 yard of 5-inch ribbon for bow.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Survey Of Crops And Livestock

Collecting Statistics Of Acreages Under Crop And Number Of Livestock And Poultry On Farms

In June of each year, the Dominion Bureau of Statistics, in co-operation with the Provincial Departments of Agriculture, distributes cardboard schedules to farmers for the purpose of collecting statistics of acreages under crop and the numbers of livestock and poultry on farms. An innovation of 1931 extended this survey to cover the breeding and marketing intentions with regard to livestock. In all of the provinces, except Nova Scotia, Alberta and British Columbia, these schedules are distributed to the farmers through the rural school teachers. In these three provinces, the cards are mailed direct to the farmers.

The acreages of field crops, in particular, are the real foundation for obtaining agricultural production statistics. Only slightly less important in national planning is the necessity of having correct knowledge of the number of livestock on farms. The accuracy of compilation in both these classes is largely dependent upon the obtaining of completed cards from a fair sample of the total number of Canadian farms. We would urge upon all farmers to co-operate with the government in this undertaking.

High Cost Of Junk

Cars Purchased For Almost Nothing Menace To Traffic

An odd little footnote to the automobile was furnished the other day, when a man bought a used car for \$5, drove it out on the highway, and a few hours later got into a traffic accident that did \$100 worth of damage.

The incident emphasizes our need of some strict kind of regulation to cover the use of aged and decrepit machines. You can doubtless imagine the kind of car that can be bought for \$5; not much thought is needed to convince one that such a car must be inherently unsafe, to its driver and to others.

Why shouldn't we get busy and rule all such wrecks off the road? The highways are dangerous enough, even when all cars are well equipped and in perfect condition.

To permit \$5 cars from the junkyard to operate is sheer folly.—Guelph Mercury.

Melons Dislike Noise

Why melons are fewer and more sickly in Southern France than years ago has been learned. It is noise. Chinese gardeners declare that loud sounds are harmful to the fructification of the melon blossom. Auto horns and the shaking of heavy vehicles on highways and rails have so disturbed the blossoms that they have ceased to thrive.

ONE WAY OF CROSSING THE CHANNEL

A year ago Mr. Schlippepoort of Holland, performed the difficult feat of cycling across the English Channel on a water-bicycle. This year he intends to attempt a more difficult task, and paddle across the Channel in a barrel equipped with a sail and radio. Here we see the daring Dutchman with his unique craft.

American Writer Says Part Of War Loan Should Not Have Been Charged Against Allies

The Password Is Quality

Canada Following Up Her Good Work In Poultry Exports

"If Canada is going to get its share of the British trade in poultry, in bacon, in live cattle, or in any other of its agricultural products, the value and necessity of doing things better, not worse than competitors must be regarded as all important," said Mr. W. A. Wilson, Canadian Government Animal Products Trade Commissioner in London, England, during his present visit to the Dominion. "We made a good reputation with our first shipment of turkeys, because the quality was there and they were graded and packed according to government standards. The British trade responds to work well done. There is the market for Canadian poultry and other products and the password is quality."

"The season for exporting poultry to Britain should be designed for the 12 months of the year. Buyers over there do not want to change their source of supply if they can be assured of the demand being met at all times."

"Canada should follow the same policy in connection with the present opportunity open for the export of dressed chickens as it has done with turkeys exported to Britain for the 1932 and 1933 Christmas trade. The 1,000,000 pounds of turkeys shipped in 1932 were 300 per cent. as to quality. In 1933 they were not quite so good as the previous year but this was due to some unusual difficulties associated with the shipping and are surmountable. Turkeys for the British Christmas trade must reach the buyers at least one week before Christmas day."

Favor Separate Grade

English Co-Operative Societies Would Like It For Garnet Wheat

English co-operative societies, importing and milling Canadian wheat, went on record before the common agriculture committee at Ottawa as definitely favoring a separate grade for Garnet wheat. The English co-operatives were represented by their Canadian buyer, R. T. Jackson, Montreal.

Mr. Jackson, however, was unable to elaborate on the co-operatives' attitude toward Garnet.

The committee passed a resolution asking the English co-operatives to present their reasons for favoring a separate grade for the Garnet variety in a brief.

The following letter written by Edmund Platt of Garden City appeared in a recent issue of the New York Herald Tribune:

When Mr. Lippmann writes about the so-called war debts he has something to say worth reading. He did well to point out that when the United States first entered the war our part was expected to be mostly financial. We were to furnish a large part of the munitions and food for our Allies in Europe and were to pay the bills—as our contribution, not as loans. We did pay the bills, but instead of regarding them as a part of our own war costs we charged them up, added the interest and finally refunded the whole thing into an impossible pyramid of principal and interest to be repaid over a period of some sixty years.

It seems to me that it is not yet too late to separate that part of the war loans that should never have been charged against our Allies from the loans that were used for reconstruction. Roughly all of the loans made during the first year after our entry into the war, down to April, 1918, when we had practically no troops in the field, should be cancelled. The money was all spent in our own country and the supplies sent to our Allies by its spending saved the lives of thousands of our boys. Why should we expect this money to be paid back to us? Cancelling the first year's loans would wipe out more than half of the debt and leave a sum that could probably be managed.

The trouble with the debts, as Mr. Lippmann says, came from charging the original advances as loans and failing to distinguish between such proper contributions to the success of the war and the reconstruction loans.

Wouldn't it be much cheaper to cancel half the war debts and so stop making good more valuable by continuing to add to our already superfluous hoard through war debt payments?

Hog Sales In West

Alberta Stands Second As Hog Producing Province

Alberta stands second only to Ontario as Canada's largest hog producing province. In 1933 Alberta marketed 1,032,169 hogs, or 32.36 per cent. of the total marketed in Canada. Ontario marketed 1,350,899, or 42.55 per cent. of the total. Saskatchewan marketed 1,313,717, a total of 490,299 hogs or 15.37 per cent. Manitoba fourth with 244,577 and Quebec fifth with 65,768 hogs. Over 55 per cent. of Canada's hog crop comes from the three prairie provinces.

Ontario has the highest quality, 24.23 per cent. of her hogs grading select and 78 per cent. grading in the two top grades. Manitoba is second in quality, 17 per cent. grading select and 58 per cent. in the two top grades. Saskatchewan is third with nearly 12 per cent. selects and 44 per cent. in the two top grades and Alberta fourth with 8 per cent. selects and 40 per cent. in the two top grades.

A Popular Vegetable

Asparagus Was Used By Early Greeks And Romans

Asparagus was esteemed as a vegetable when Greece and Rome were at the height of their glory, and is very popular today. The name, a Greek one, has had various forms in English and in the eighteenth century the corruption "sparrow grass" was popularly used. While this use would today be considered a sign of ignorance, Walker's Dictionary said in 1791: "Sparrow grass is so general that 'asparagus' has an air of stiffness and pedantry." On the steps of Russia this plant grows wild in such profusion that the cattle eat it like grass.

California, which developed its orange industry on the Navel orange, now has two million more Valencia orange trees than Navel.

BABY'S CRAMPS Banished!

"When I could not sleep at night with baby's cries, it was Baby's Own Tablets that saved the life of my baby. Baby's Own Tablets are mild and soothing in action, yet most effective and always safe for colic, teething troubles, constipation, summer complaint, upset stomach, restlessness and simple fever. Price 25c everywhere."

Dr. Williams' **BABY'S OWN TABLETS**

WORLD HAPPENINGS BRIEFLY TOLD

Holland is reported to be concerned over the intensive trade invasion by Japan of the Dutch East Indies.

The oldest continuously published newspaper in Canada, The Montreal Gazette, recently celebrated its 150th birthday. Its first issue appeared June 3, 1778.

The calling of an imperial conference for the creation of an Empire air force will shortly be suggested by Lord Elibank in the House of Lords, it was learned.

Belgium may pay her 1934 war debt instalment to the United States with a \$10,000,000 shipment of radium, according to an unconfirmed report at Brussels.

John L. Beckwith, former mayor of Victoria, and resident of British Columbia since 1884, died recently. He had engaged in the salmon canning business for 31 years. He was born in Cornwallis, N.S.

Wiley Post, round-the-world flyer now tuning up his plane for the London-to-Melbourne \$750,000 air derby in October, recently announced he also has his eye on the world's altitude record.

The German version of the motion picture, "The Trial of Mary Dugan," was banned from theatres of the Reich because it was regarded as a plea against capital punishment, it was learned. As such it was contrary to Nazi principles of law enforcement, it was explained.

The British House of Commons approved repeal of the duty on insulin, diabetes remedy discovered in Toronto by Sir Frederick Banting who was knighted in the King's birthday honors list. During debate on the move congratulatory references were made to Sir Frederick.

Two-and-a-half million feet of lumber will be shipped over the Hudson Bay Railway and through port of Churchill in northern Manitoba to Great Britain by The Pas Lumber Company of The Pas, Man., according to D. D. Rosenberg, secretary-manager of the company at Prince Albert.

Thousands Always Ill

Reducing Funds For Public Health Not Sound Economy

Elimination of disease has done more to increase material prosperity than any other one thing, declared Dr. Gordon Bates, of Toronto, general director of the Canadian Social Hygiene Council, in an address in Ottawa. But even to-day two per cent. of the population was constantly ill, representing 160,000 adults in Canada. Parsimony in the expenditure of public funds for public health was unsound economy, maintained the doctor. The administering of toxic food to children who were well would prevent diphtheria. Compulsory pasteurization of milk was another preventative that should be insisted upon in the interests of national health.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile
—No relaxation necessary
For you to feel healthy and happy, your liver must pour two pounds of liquid bile into your blood, every day. Without this bile, trouble starts. Poor digestion. Slow elimination. Poisons in the body. General weakness. How can you expect to clear up a situation like this completely with laxatives, cathartics, salts, oil, mineral water, laxative candy or chewing gum, or roughage? They don't wake up your liver.
You need Carter's Little Liver Pills. Purely vegetable. Safe. Quick and sure results. Ask for them by name. Refuse substitutes. See all druggists.

Agricultural Notes

Many Items Of Interest To The Western Farmer

While strawberries, like other fruits, are grown successfully on the prairies, they are not produced in commercial volume.

Sulphur has proved to be one of the most effective fungicides for the control of diseases caused by rust fungus.

Sales of hogs to stock yards and plant for the four months ended April 30 were approximately 19,000 more than for the corresponding period last year.

Of the clovers in 1933, red clover seed yielded particularly well in central and western Ontario, and this raised the total production in Canada above normal.

The basic reasons for the urge to form co-operative fruit associations in California during the past 60 odd years have been low prices to growers.

Shipments of livestock from Western to Eastern Canada for the first four months this year included 29,267 cattle; 164 calves; 52,908 hogs, and 40,423 sheep—all increases except hogs compared with last year.

In spite of the heavy decrease in Canadian exports of wheat to France in the past two years, this commodity still accounted for 61.56 per cent. of Canadian total sales to France in 1933.

The total value of the 1933 timothy seed crop is estimated at \$163,090 as compared with \$225,000 for the 1932 crop. The selling price per pound for the 1933 crop was about 6½ cents as compared with 5½ cents in 1932.

Grading and inspection of honey when exported are compulsory under the terms of the new Fruit and Honey Act. Honey, when shipped from one province to another, must also be graded but inspection is optional except for administrative purposes.

The increase in the sales of branded beef in Canada for the first four months of this year was considerably more than two million pounds compared with the corresponding period last year, namely, 12,209,056 pounds this year; 10,167,515 pounds last year.

One factor which is favourable to the consumption of Canadian and other Empire tobaccos in the United Kingdom is the decision of the United States government to restrict tobacco acreage and to force leaf prices to a more economic level by increasing the price to smokers.

Air-dried peat and muck will absorb 2 to 6 times their weight of liquid, and in this respect they compare very favourably with straw, the bedding material almost universally used on the farm. Peat moss, commonly known as moss litter, may absorb ten to fifteen times its own weight of liquid.

The government of Canada first appointed an official entomologist in 1884, but the real development and expansion of the work did not begin until about 1909, when the finding of the dreaded brown tail moth in shipments of nursery stock from France necessitated the passing of legislation in 1910, giving the government power to inspect plant products entering Canada, and to take steps to prevent the spread of insect pests already prevalent in the Dominion.

Train Run By Electric Eye

Invention Tested By German State Railways May Be Adopted

Trains in Germany may be operated by an electric eye if an invention recently tested by the German State Railways is adopted. Control of a train is through photo-electric cells which operate the brakes by means of a light signal, but the light itself is provided by the engine. A dynamo on the locomotive feeds a lamp which throws an almost vertical cone of light into the air. Mirrors are arranged on upright supports at points along the line, and if the signal is against the train the mirrors will be in such a position as to meet the beam of light and throw it down on a pair of photo-cells mounted in the searchlight of the engine. The electric current from the cells operates a relay, and the brake magnets are opened and the train is brought to a standstill. The speed of the train can be automatically adjusted.

INTRIGUING NECKLINE—SMART COOL SLEEVES LINES THAT SLENDERIZE THE HEAVY FIGURE

To-day's model is just perfect for hot weather wear. Resides being unbelievably easy to make, it's surprisingly inexpensive. The pattern includes clear instructions as how to cut it out and put it together. The scalloped treatment is optional. The pattern also provides for the neckline, sleeves and hip line to be cut with a straight edge.

Carry it out as the original in a handkerchief-lined lawn print in blue on grey ground—you'll love it. The white organdy vest gives it a dainty touch.

Striped seersucker can be worked out very effectively in this model.

Tub silks in white and pastels are charming too.

Style No. 867 is designed for sizes 38, 40, 42, 44, 46, 48 and 50 inches bust. Size 38 requires 3½ yards of 36-inch material with ¾ yard of 36-inch contrasting and 4½ yards of binding.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap copy carefully.

Fashion Show In Russia

Latest Paris Creations Shown To Thousands Of Women

The Dress and Linen Trust of Soviet Russia has just completed its first fashion show. Forty thousand women came from all over the country to gaze with critical admiration at 150 models, derived from the latest Paris creations. What further proof is needed that the Revolution is dead? The exhibition may be even more significant than recognition by the United States. It may mark a turning-point in the history of the Soviet. True, the frills and trappings of M. Jean Patou were "modified" to suit Soviet women, but it was just as much a fashion show as if it had been held in some Fifth Avenue salon—Washington Post.

An editor was dining out. "Would you like some more pudding?" his hostess asked. "No, thank you," replied the editor, absent-mindedly. "Owing to tremendous pressure on space, I am reluctantly compelled to decline."

SUNDAY SCHOOL LESSON

JUNE 17

THE RISEN LORD AND THE GREAT COMMISSION

Golden Text: "Go ye therefore, and make disciples of all the nations, baptizing them into the name of the Father and of the Son and of the Holy Spirit; teaching them to observe all things whatsoever I commanded you: and lo, I am with you always, even unto the end of the world." Matthew 28:19, 20.

Lesson: Matthew 28:1-20. Devotional Reading: Psalm 116:1-9.

Explanations And Comments

The Empty Sepulcher and Its Message, verses 1-6. The Evangelists do not attempt to describe the resurrection of Jesus; they report it simply and briefly. Matthew tells of the visit of Mary Magdalene and the other Mary to the sepulcher late on Saturday night (the Jewish Sabbath), as the first day of the week began to dawn. Mary Magdalene was from Magdala, a city on the western shore of the Sea of Galilee. She had been freed from "seven demons," Lk. 8:2, and is often wrongly connected with "the woman who was a sinner" of Luke 7. The "other Mary" was the mother of James, Mk. 16:1. They had both been present at the crucifixion and at the burial, Mt. 27:56, 61.

The messenger "answered" the look of fear and amazement of the women and said: "Fear not, ye, for I know that ye seek Jesus, who hath been crucified." The Lord gives a reason for the soothing tone of the address. He recognizes them as friends of "The Crucified" (A. B. Simpson). Then he added the amazing news: "He is not here; he is risen even as he said." Recall Mt. 12:40; 16:21. "Come," he further added, "see the place where the Lord lay." The condition of the tomb as seen by Peter and John is described in Jn. 20:7-9.

The Risen Christ Appears to the Women, verses 9, 10. The women departed quickly with the fear and great joy (how natural were both emotions here) and hastened to report the disciples word. Their emotions were greatly augmented when Jesus himself met them, saying, "All hail!" Casting themselves down before him, they took hold of his feet and worshipped him. Kindly Jesus reassured them: "Be not afraid; go, tell my brethren that they depart into Galilee, and there shall they see me."

The Final Interview and Commission, verses 11-19. The eleven disciples went to the mountain in Galilee where Jesus had had appointed a meeting. It was a well-known meeting place, and there Jesus came to them—the appearance which probably is to be identical with the one mentioned by Paul in 1 Cor. 15:6, when he was seen by "about five hundred at once."

"All authority hath been given unto me in heaven and on earth": in these words Jesus asserted his right to command.

The future of his kingdom was Christ's supreme concern, and he issued his "great commission": "Go ye therefore, and make disciples of all the nations, baptizing them into the name of the Father and of the Son and of the Holy Spirit; teaching them to observe all things whatsoever I commanded you."

And lo, I am with you always, even unto the end of the world. These words become to us not only a belief, but an experience.

A Remarkable Pilgrim

Woman Walked Twelve Times From Oberammergau To Rome

With the death at Oberammergau of Catherine Kopp, the most remarkable pilgrim of modern times has passed away. Of peasant stock, she lived to be eighty-four, and made, on foot, twelve pilgrimages to Rome. She knew three Popes and had planned another pilgrimage for this spring. Each journey, involved walking over 1,200 miles. On reaching Rome she went straight to St. Peter's to pray at the Apostle's tomb. On one occasion she started on her homeward trip an hour after the late Pope Pius X. had received her. She made her first pilgrimage when she had passed her seventeenth birthday.

Not American Innovation

The London Daily Telegraph says an invitation card, sent out by the Duke of Wellington, at the exhibition in the Royal United Service Museum, is a reminder that the dropping of the "u" in such words as "honour" and "labour" is not an American innovation. Like so many Americanisms it has Anglo-Saxon antecedents. The card said for the "honor" of the company of Lieutenant-Governor Sir James Macdonell at the dinner given by the Duke to celebrate the anniversary of Waterloo.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Little Journeys In Science

HELIUM

(By Gordon H. Quast, M.A.)

It is a very interesting fact that scientists observed a new element in the sun long before it was discovered on the earth. This new gas was given the name helium, from the Greek word "helios," meaning the sun. It was detected in the sun by means of the spectroscope, an instrument which the scientist uses to determine what elements are present in any light-giving body.

This gas occurs only in very small amounts in the air, but it is found in larger amounts (as much as one per cent.) in the natural gas of Texas, Kansas and Alberta. It is about seven times lighter than air and hence is used for inflating balloons and dirigibles. It will not burn and is as safe as hydrogen, which is a very inflammable gas. Helium is obtained from natural gas by freezing out or liquefaction of the combustible gases. At Calgary, Alberta, are located such plants, each of which can liquefy 60,000 cubic feet of gas per hour. The helium is taken out and the gases are then returned to the city mains.

Engineers have recently found an important use for this gas. Men obliged to work in compressed air, as in caissons under water in tunnel construction, often collapse when brought too quickly into air at ordinary pressure. This is because the nitrogen of the air dissolves under pressure in the blood, tissues, and even in the spinal cord. When the pressure is released, this nitrogen escapes in bubbles which may destroy the spinal cord, affect the brain, interfere with the action of the lungs, and even cause death. This limits the depths to which divers may go down with safety. Helium is much less soluble than nitrogen and dissolves more rapidly, so that if the locks where the air pressure is reduced are filled with helium and oxygen instead of air, which is a mixture of nitrogen and oxygen, the danger is removed.

Railway Workers Musical

More than 2,250 railway workers took part recently in a musical festival in Reading, England. They came from all parts of England and Wales, and the contests were held in four walls. Poems were submitted by a dock foreman, a fitter, a shunter and a tube cleaner. In the shunter's solo class they heard the voices of a wheel tapper, a lampman and a clerk.

PAYMENTS ON WAR DEBTS SAID TO BE RUINOUS

London.—The House of Commons should overruling approval as Neville Chamberlain, chancellor of the exchequer, announced that war debt payments to the United States have been suspended until the United States is ready for a conference on a reasonable final settlement.

Amid shouts of "hear, hear," from opposition and government benches alike the chancellor declared "we are not defaulters." If Britain could have been assured she would not be in default June 15 by making another token payment, then she would not have been willing to make a payment as concrete evidence of good faith, he added.

But since the Washington congress passed the Johnson bill, President Roosevelt could not assure nations paying a "token" that they would not be in default. Therefore Britain decided to suspend payments entirely. But the chancellor stressed that Britain has never contemplated repudiating the debt.

When the British ambassador in Washington was told after passage of the Johnson bill that token payments would be classified as default, said Mr. Chamberlain, the government had to choose between paying the full \$262,000,000 or else suspending all payments pending a final revision of the existing war debt settlement. The settlement was labelled unjust in the British note to Washington. For one thing, Britain has paid roughly half the amount she owed, yet finds herself owing more than ever because of interest.

"The resumption of full payment would have revived the whole system of inter-governmental war debt payments and would have postponed indefinitely the chances for world recovery," said the chancellor.

There was a little resentment that Washington made the note public, whereas the British government understood it would be released simultaneously with announcement in London. The chancellor, however, merely said that owing to some confusion it was released shortly after being presented, but he did not blame the United States government.

The position was generally approved by the press. The Liberal Star declared the action should have been taken long ago, and took it for granted the note opened the way for clearing up the whole situation.

"The note makes it clear to the most middle-western mind," the Star added, "that any attempt to resume these payments will be ruinous to both countries."

The Evening Standard, Lord Beaverbrook's organ, said that President Roosevelt was inconsistent in condemning "unproductive nationalistic expenditures," meaning arms, when he himself was sanctioning huge expenditures in his own country.

France To Export Wheat

Has 1,500,000 Bushels To Sell At Fifty Cents Is Report

Paris.—Reports were current here France is prepared to export more than 1,500,000 bushels of wheat at a price of slightly less than 50 cents a bushel. The wheat, it was said, would go to the United Kingdom and Denmark.

Usually well informed sources said they expected the French government would be asked to maintain a minimum domestic wheat price at a level to be determined after the yield of the current crop becomes known.

It was reported 50,000 metric tons (1,333,333 bushels) of wheat would be exported to Britain and Denmark at 28 francs (currently \$1.82) a quintal. That would place the price at 49½ cents a bushel, f.o.b. French ports.

In addition the government would grant an export bounty of 80 francs a quintal (about \$1.41 a bushel) bringing the total price paid exporters to 108 francs a quintal (\$1.91 a bushel) as compared with the present minimum domestic price of 130 francs a quintal (about \$2.30 a bushel).

W. N. U. 2050

Advocates Works Program

Premier Pattullo Of B.C. Urges Huge Expenditure

Vancouver.—Premier T. D. Pattullo returned to his long-time advocacy of a \$200,000,000 public works program in Canada, and in the same address declared British Columbia would pay the principal of her debts 100 cents on the dollar.

He was addressing a joint gathering of the Vancouver Board of Trade and Canadian Club.

"I don't want to inflate," he said, outlining his public works proposal. "I don't want to take a dollar from a man who has it, but he is going to lose it if unemployment continues."

The difference of opinion between his government and the Dominion on public works, was not one of principle, but of amount.

He suggested sufficient currency could be issued to create a credit of \$200,000,000, which could be loaned to the provinces on a per capita basis without interest. It would be paid back through a sinking fund within the lifetime of the works undertaken. The increase in debt would not be sufficient to hurt the country's external credit.

Held Many Important Posts

Former Resident Of Winnipeg Died Recently In England

Winnipeg.—W. L. Griffiths, former secretary to the Canadian high commissioner in England, died at London June 5, according to cable dispatch received here. Death was ascribed to heart disease. He was 69 years of age.

Mr. Griffiths came to Winnipeg from Bangor, North Wales, 50 years ago and was one of the first exporters of Manitoba wheat to Great Britain. In 1897, during the government of Sir Wilfrid Laurier, he was appointed Canadian commercial agent.

He succeeded J. G. Colmer as secretary to Lord Strathcona, then high commissioner, in 1903. Later he became the right-hand man of Sir George Perley and served during the World War period. He retired shortly after Rt. Hon. P. C. Larkin took office in 1924. Two sons survive.

Indians Face Murder Charge

Alleged Slayers Of B.C. Constables Given Preliminary Hearing

Merritt, B.C.—Four Indian brothers, Richardson, Eneas, Alex and Joseph George, have been named by a coroner's jury as the slayers of Dominion Indian Department Constable F. H. Gisbourne, and B.C. Provincial Police Constable Perry Carr on May 23.

Gisbourne and Carr were slain near the Canford Indian Reserve and their bodies thrown into the Nicola river. Gisbourne's body was recovered.

Three of the brothers, Richardson, Eneas and Alex have been charged with murder and were given preliminary hearing. Joseph is in hospital here with a fractured skull.

Death Sentence For Theft

Seven Persons In Ukraine Receive Heavy Penalty

Kiev, U.S.S.R.—Seven persons accused of taking part in organized thefts of money and supplies from the agricultural supply trust were sentenced to death by the supreme court of the Ukraine, and 24 others were given prison terms ranging from one to 10 years.

The convicted persons, all of whom were employees of the trust, included a number of members of the Communist party.

For Canadian Navy

Ottawa.—A powerful Canadian naval force capable of co-operating with the Empire and to taking over completely the defence of the Dominion and Dominion shipping, was urged in the senate by Major-General W. H. Griesbach of Idaho.

Snowstorm In Idaho

Boise, Idaho.—A snowstorm whipped the high country of the Boise National forest June 5, while flowers were in bloom. As much as four inches of snow piled up in some places. Most of it melted quickly.

PROF. F. H. ANDERSON

of the Department of Philosophy of the University of Toronto who will be one of the Canadian representatives at the English International Congress which meets in Prague this summer.

Want More Pay

Employees Of Canadian Packers Reported To Have Asked Company To Restore Wage Cut

Toronto.—The Toronto Globe states that 1,400 employees of Canada Packers, Limited, were reported to have asked the company to restore in bulk a 10 per cent. wage cut made effective in 1931 and rescinded last October.

The newspaper quoted General Manager N. J. McLean, of the company, as saying the plant relations committee had approached the management with "certain questions," the nature of which he did not disclose.

It said the representations of the employees resulted from newspaper reports of the parliamentary committee's scrutiny of the affairs of the company.

Mr. McLean, it said, explained "certain questions were put to the management as a result of what happened at Ottawa."

Rain Checks Forest Fires

Raging Less Furiously In Maritimes But Serious In Ontario

Toronto.—Forest fires continued to burn in scattered areas of Maritime Canada and Newfoundland, but less furiously for rain in some districts held them in check. The situation in Ontario continues serious and 500 men are fighting the blazes.

Forest protection aviators reported an outbreak on the international border between Maine and New Brunswick that had been raging unnoticed for a week, leaving in its wake a worthless stumpage of 40,000 acres.

BRITISH COLUMBIA HONORS FAMOUS EXPLORER

Here we see Mr. W. McAdam, Acting Agent General in London for British Columbia, placing a wreath on the grave of Captain George Vancouver, the explorer, to commemorate the 150th anniversary of his death. The man who gave Vancouver his name is buried near Petraghram Church, Richmond, Surrey.

To Make A Profit

Government Stands To Make \$38,000,000 On Sale Of Gold

Toronto.—The federal government stands to make a profit of approximately \$38,000,000 in the gold which will be taken over from the Canadian banks at the statutory price of \$20.67 an ounce, according to an estimate based on the latest official bank statement.

The government bank statement for April 30, the latest available, gives the amount of coin in possession of the banks as \$39,928,171. A Toronto banker estimated for the Canadian Press that 95 per cent. or about \$38,000,000 of the total, was in gold coin. In addition the banks hold at agencies outside Canada \$9,159,554, bringing the total up to roughly \$47,000,000. The prevailing premium on gold, now selling in New York at \$35 an ounce, is about 70 per cent. over the old price of \$20.67, giving a profit of \$33,000,000.

Rain Revives Crops

Crop Prospects Throughout West Greatly Improved

Winnipeg.—Jubilant over crop prospects throughout Western Canada's wheat belt grew with further rainfall over the western southern sections. For the farmer the era of dust and drought was fast becoming a memory.

Light to moderate showers fell over southern Saskatchewan and some parts of southern Alberta. Scattered showers were reported over widespread sections of Manitoba.

Cool temperatures continued to hold in check a grasshopper menace that a week ago threatened to become acute. Many farmers in Alberta and Manitoba, their hopes renewed by rains that ended a 13-day drought, discussed plans to remain on farms they announced would be abandoned.

Berry Shipments

B.C. Strawberry Consignments Have Already Totalled That Of Last Year

Victoria.—British Columbia strawberry shipments to prairie and eastern Canada markets have already equalled last season's totals and, by the end of the season, will be close to record figures, it was indicated by the markets branch of the provincial government.

To date 90 cars have been shipped and another 20 cars are ready to go. The record of 132 cars was established several years ago. Only 92 cars rolled last year.

Six cars were sent as far east as Toronto and Montreal this year to mark the first time B.C. berries have reached that market in volume.

FRANCE HAS A NEW PLAN FOR ARMS PARLEY

Geneva.—Temperers were cooled down when the steering committee of the world disarmament conference met again and a new French plan of action was presented along with declarations that nobody more than France would welcome Germany back into the parley.

But although the atmosphere was calmer, there was no narrowing between the two great groups led by Britain, on the one side, and France on the other. With the gulf as wide as ever, the steering committee adjourned. In the meantime, the British, French, United States and other delegates will hold conversations in an effort to find agreement as to what may be proceeded with.

Roughly speaking, one section wants the parley adjourned so the governments can progress through diplomatic channels, chiefly attempting to get Germany back into the conference she left abruptly in October. The other wants the conference to get right down to work, chiefly discussing security, which is first and foremost so far as France is concerned.

"Germany's return overshadows all our discussions," declared Barthou, but he stuck to his statement that the conference could not go hat in hand and beg the Hitler government to return to the fold.

"We assure you we are more happy than France to see Germany return," he went on. "No door is closed. In the Saar question France has just shown her goodwill by joining in an international engagement to which Germany is a party."

"The conference should neither impose conditions in Germany nor accept conditions from Germany," he added. "Germany must be able to cross the threshold with complete equality of rights—but she must also accept responsibilities which thenceforth will be common to all."

Planning Abandonment Of Duplicated Lines

Railways Co-operating In Effort To Reduce Expenses

Ottawa.—It would be improper for the trustees of the Canadian National Railways to enter into any controversy over the suggestions for amalgamation publicly advanced by E. W. Beatty, president of the Canadian Pacific, in opinion of C. P. Fullerton, chairman of the trustees, expressed before the house committee on railways and shipping.

Mr. Fullerton made his second appearance before the committee and presented a brief covering three phases of the railway problem, co-operation with the Canadian Pacific, capitalization and amalgamation proposals.

The co-operation efforts up to date had yielded a saving estimated at \$1,200,000 in yearly joint economies. Projects of co-operation to reduce duplication now under study involved abandonment of approximately 2,100 miles of line on 36 different projects, while Canadian National economies contemplate further abandonment of 1,150 miles of light-traffic lines in various parts of the country.

R.C.M.P. Colors Arrive

Arrangements Being Made For Formal Presentation In July Regina.—Of dark red silk, four feet by two and one-half feet in size, the Royal Canadian Mounted Police colors have reached Regina headquarters from London, England.

Colors will be formally presented next month. Arrangements for the presentation are being made by Ottawa.

The colors are elaborate and emblazoned with battles in which the force took part in its 61 years' service.

Battles commemorated on the colors include the Northwest Rebellion of 1885; the South African uprising of 1900-02; the Great War and the Siberian expedition of 1918-19.

Until the present, the force has never had its own colors.

Saturday, June 23rd.

Duffield Athletic Club will hold their annual picnic on Saturday, June 23rd, on their new grounds. They have just finished fixing up six acres with a circular horse track around the grounds, a new grand stand, baseball diamond, two horseshoe courts, booths and a basketball court. They are looking forward with enthusiasm to the 23rd, and, no doubt, if the weather is fine, expectations are for a record crowd.

A high-class program has been drawn up, with generous cash prizes for all events, the horseshoe contest alone being \$10 for 1st prize.

The sports committee has re-matched "Kid" Gruden with Wynne Burnett for the main boxing event. It will be remembered that these boys fought at Duffield last year to a draw. There will be three preliminaries—one of these being between two midgeys, Jimmy Brass vs. Young Teague; to see these kids take He-man swings at each other is alone worth the trip to Duffield on the 23rd.

The sports committee has been fortunate in getting on their program Gil Knutson from Tacoma, who is at present on a holiday in Edmonton. Gil has a good reputation as a wrestler on the Pacific coast, where he broke into professional ranks four years ago.

Duffield Athletic Club is asking the people of West Edmonton to give their support to this sports day, as we proudly say we are the only town west of the city which sponsors such a day as you will see at Duffield on Sat., June 23rd.—A. B.

One on the Barber.

Motorist—Five gallons of gas.
Gas Man—Yes, sir; and any oil?

Motorist—No, just gas.
Gas Man—Want the car washed, too?

Motorist—No, just gas. I said.
Gas Man—How about some skid chains?

Motorist—No. Gas is all;
Gas Man—Does she need greasing?

Motorist—No! Gas, gas, gas. Nothing but gas. Cut the chatter.
Gas Man—Yes sir.

And as the motorist drove away very hot under the collar, the garageman added,—Well, that's one time I got even with my barber.

Canadian Co-op. Dairies.

The oldest co-op. dairy on record in Canada and which is still engaged in active business, is in Pr. Edward Island, was established in 1885, and since then has been manufacturing cheese and butter, and conducting a business on the co-op. plan.

In the same province, five years later, the Hamilton Cheese Co. commenced business, and by 1900 there were 11 co-op. dairies on the island serving their many farmer patrons.

U. of A. Summer School.

The University of Alberta Summer school will be held this year from Tues. July 3 to Aug. 14, according to information received from Registrar Owsell. Courses will be given in the Faculty of Arts under the jurisdiction of Dean Kerr. Further information may be had by communicating with the Registrar's office.

Sparkie Says.

If money is the root of all evil, then most of us must be leading blameless lives these days.

Our guess is that the guy who said there is something good in everything never came across the bottle when it was empty.

Wheat and Bread Prices.

The price of bread is an obvious daily recorded fact, and naturally the popular tendency is to think of bread prices in connection with wheat prices. Every other cost in the production of bread is hidden from the public, and consequently the public ignores these other costs when thinking of bread costs.

The problem of bread is not one which can be properly and justly considered in relation to wheat only. We do not eat wheat, and between wheat and bread there are very many economic processes, all of which enter into the cost of bread. Wheat, flour, bread constitute a single problem, the supply of the people's food, and the three ought to be kept together in order to determine what is just to both producer and consumer.—Manitoba Co operator.

The Municipal District of Inga No. 520.

PUBLIC NOTICE

IS HEREBY GIVEN that there has been introduced in the Council of the Municipal District of Inga No. 520 a By-Law of which the following is a short synopsis:

—"That in order to provide for the hospitalization of sick residents of that portion of the Municipal District of Inga No. 520 which is not already included in the Onoway Municipal Hospital District No. 7, and in order to carry out the provisions of the Municipal District Act and the Hospitals Act in that behalf. The Council shall enter into an agreement or agreements with approved Hospital or Hospitals for the care and treatment of sick residents of that portion of the District which is not already included in the Onoway Municipal Hospital District No. 7.

Which agreement provides for payment by the said portion of the District to said Hospital or Hospitals entering into the agreement the sum of seventy-five cents per patient per patient day for Public Ward patients.

The payment of such fees to relieve the Municipality from all or any further claim or liability for hospitalization of such patients."

And that a copy of same may be seen in each of the following places:

Office of the Secretary Treasurer.
Residence of the Councillors.
Bright Bank P.O.
Carvel P.O.

OCCASIONAL WIFE

By
EDNA ROBB WEBSTER
Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS
Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Mrs. Weston, a wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of \$1000. Camilla takes his exhibit, and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Inspiration Youth," and Avis "Inspiration." Peter adopts the latter title and Camilla, heartless goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

(Now Go On With The Story)

CHAPTER XLVII.

The three exclamations over the discovery were almost on one breath. But the reactions of the trio were as different as the three individuals. Peter sprang toward the scattered pieces of plaster and fell down on his knees with a groan like a great building collapsing in an earthquake. Avis' expression of horror changed suddenly to angry accusation as she turned to Camilla, who glanced perplexedly from Peter to Avis, and was on her knees beside Peter in an instant.

Her hands fumbled futilely with fragments of plaster as if they would fit them together again; then they faced each other desolately. For a moment they seemed to be paralyzed with the horror of this unbelievable catastrophe.

Finally Camilla faltered, "Oh, Peter darling!"

Swollen Joints

often are a warning that your kidneys have become deranged and need attention. Don't suffer needless pain. Take Gin Pills to obtain relief and assist your kidneys to function properly.

W. N. U. 1909

Anger flamed in his eyes, just as Avis demanded in a shrill voice, "How could you?"

Camilla looked wildly from one to the other. "How could who?" her dry lips whispered Avis. "You did it!" "You?" accused Avis. "You did it!" Camilla put up a protesting hand to push back the flame which leaped from Peter's eyes upon her, the room swayed and she sank down, down into a deep black abyss. Above her, behind her, faintly clanking, footsteps that resolved into stampeding thuds, confusion, that seemed to pass over her head and trample her into oblivion.

Voices, sounds, rushed back to her from a void . . . her head . . . where was she . . . what had happened? She tried to raise her hand, but it would not move, it was too great an effort to open her eyes.

The medley of sounds resolved into distinct words. Ah! Yes, she remembered. They had found Peter's statue destroyed and somehow, it had been much for her. Her thoughts slipped away again. Then a girl's voice—it was Avis—declared angrily, "Of course she did it. Jealous!"

That was it. Avis had accused her of destroying Peter's precious work, and Peter—Peter had looked at her as if he believed it. Peter's angry, reproachful, accusing eyes had added their pain to her first shock over the discovery, until she couldn't bear it. It was all so horrible. Why couldn't she have kept her senses and defended herself against them? Why did they accuse her, she wondered for a bewildered second. Oh, yes, she had been alone in Peter's room, alone in the dark, when he and Avis came in and discovered the broken figure.

She moved her hands protestingly, opened her eyes, but they were being over her. Terry was beside her. He said, "She'll be all right, now. Just let her rest. Don't try to talk to her."

Camilla was grateful for that advice. She wished they all would leave, and decided to be very quiet until they did. But just then she began to sob unrestrainedly. Tried desperately to stop, and could not.

"She's all right, now," Cathie pronounced. "Leave her alone. She can't help crying. That's the way she comes out of a faint like that—either laughing hysterically or crying. Let's all get out of here. There, honey," she stroked Camilla's hand. "Take it easy now, and don't you try to leave here tonight." Cathie's voice was gentle with sympathy, but edged with resentment when she spoke to the others, and managed to persuade them all to leave.

Finally the door close after them and left a heavy silence which expanded and filled the room. Camilla was quiet now, her eyes closed. She lay rigidly for some time, wondering if she were entirely alone. Suddenly stirred across the room, came toward her where she lay on the couch. She opened her eyes. It was Peter. Her heart ached when she saw how haggard and pale his face was.

He asked quietly, in a hollow voice, "All right?"

She nodded, and slow tears rolled weakly down over her temples. She could not stop them. She held her hand toward him, appealingly, and whispered, "You—don't think—I did it, Peter?"

He did not touch her, drew his hand across his eyes, wearily. "I can't think. What's the use, anyway? It's done."

"But, darling Peter," she insisted desperately, "Surely you can't believe I would do that to you?"

"Of course not," he replied dully, as if what he might believe was of little consequence. He was stunned, grieved, angered, puzzled. Accusing anyone, or thinking anything, made no difference.

The thing on which he had labored and agonized for weeks, his possible opportunity for the Paris scholarship, his whole ambition, it seem now—all this someone had destroyed in one maddened moment. How, how or why was of no importance.

It had been Avis who insisted that Camilla did it for revenge for his neglect of her and accusations to her. No one else had agreed, but everything had been so confused. It didn't seem plausible that Camilla could have done the thing, even if she were justified. Still—someone had to do it—they had found her alone in the

MAKES FALSE TEETH FEEL LIKE NATURAL

There must be a reason Dr. Werner's False Teeth are the world's largest seller and prescribed by leading dentists; it holds teeth so firmly—they fit so comfortably—that all day long you forget you ever had false plates. Leaves no colored, gummy paste—keeps mouth sanitary, breath sweet—the best powder you can buy yet cost is small—any druggist

darkened room—but what did it matter, now?

He dropped listlessly into a chair beside her, covered his face with his big shapely hands. There was a long silence, while their thoughts moved in relentless circles, always back to the same unalterable tragedy.

Camilla sat up slowly, straightened her hair and rumpled clothes. Peter looked up inquiringly.

"I must go home," she said wanly. "You are in no condition to go anywhere," he protested. "Here, let me help you get your dress off, so you can rest. You are going to stay here with me, tonight."

"But you don't want me to." "Sure I do. Why not? Naturally, I don't feel very jolly over—everything. Besides, I should let you go home alone, and it would be much better if you stayed here."

There seemed to be nothing else she could do. Under any other circumstances, she would have stayed gladly, to try to comfort him in his grief and disappointment. He had said he did not believe she was guilty, but there was that horrible weight of injustice that dragged at her heart and made it so difficult for her to say or do anything. As Peter had said, it was done, and no condemnation could change it. Could he believe she was guilty, and still deny it. It made no difference to him.

The guests had gone, excited, in the traffic event of the evening, protesting her verdict. Avis was alone, as so horrified as anyone involved in the tragic event of the evening.

It wasn't just Peter's sculpture and his ambitions that were shattered, which had pre-eminence in her thoughts. What most appalled her was the sudden shattering of her own hopes, his criticisms of Camilla increasing gradually, his obligations and gratitude to her becoming more involved, his success imminent, his temporary separation from Camilla all but accomplished.

Had she been too bold in her confidence? Had she flaunted her power over Peter too soon, and Camilla had taken this revenge? There could be no other explanation. Her grief was a mixture of defeat and anger. She was cornered, now way out now. Still—if Peter were able to believe that Camilla had done this despicable thing to him, it was the end for them. He never would accept for his wife the woman who had deliberately ruined his first chance toward success. Perhaps, after all, she still held the winning hand.

She wondered what might be going on now behind that other closed door. Poor Peter was so stunned and grieved that he couldn't even think, yet. And with Camilla just recovering—could that faint have been posed to favor her innocence?—very little probably would be said by either of them to-night. But she was glad that she had planted that little seed of suspicion at the first moment—the only time that would have been opportune for it. She could not have waited until tomorrow and calmly told Peter that she suspected Camilla. Impulsively, naturally in such circumstances, she had spoken

he first thought that came to her mind. What explanation was more plausible?

She opened her door into the hall, stealthily, and listened. No sounds from Peter's room. She closed the door again and resignedly prepared for the night. There was nothing else for her to do.

(To Be Continued)

The Ingenious Asiatic

Japanese Are Great Imitators And Stop At Nothing

Everybody knows that the Japanese are a wonderful people, but few of us understand just how wonderful they really are. Every day brings new proof. Virginia tobacco growers, according to a Times dispatch from Danville, are greatly disturbed by the threat of an imitation Virginia cigarette made from native Japanese tobacco and flavored with a German extract from cheap Virginia leaf. The ingenious little Asiatic people who can imitate foreign electric bulbs and bicycles and gramophones are now imitating Nature's work in our Piedmont tobacco fields.

Where will they stop? The prevalent impression is that they will stop at nothing. Universal unemployment threatens the nations because the Japanese will soon be making all the Grand Rapids furniture in the world, and all the Detroit automobiles, and all the Swiss cheese, and British Southdown mutton, and French champagne, and Mexican tamales, and Brazilian coffee, and Australian wool.

In every industrial trouble anywhere in the world to-day the motto is "Cherchez le Japonais." From the size of the Japanese "menace" there must be about 800 million Japanese and each one of them must be as clever as a thousand devils—New York Times.

THE RHYMING OPTIMIST

By Aline Michaels

A SINGLE PACE

"What shall I do with my life?" you can sing.

"With the years that are coming, grave years or gay?" And while you wonder, life slips away.

Life is a road that stretches far. Glad years finished, bare years that are And years yet to be, each glow like a star!

The road goes winding, goes flowing From east to west and from sky to sky. The road where your love and your toiling lie.

It wanders and reaches from rim to rim Of far horizons, uncertain, dim, And no man knows what it brings to him.

Though your road for year after year May change, through many a strange and lovely place, You can shape it for only a single pace.

All of life that is given to any man To fashion after his hopes' bright plan Is a breath's brief space, is a foot-step's span.

Forgotten By Time

Lost Race Of Primitive Savages Found On Pacific Island

Mrs. Zita Baker, a young British woman, has returned to England after spending four enduring months among a "lost race" of savages.

Mrs. Baker is the wife of Dr. John R. Baker, of Oxford, leader of a scientific expedition sent out to the New Hebrides, in the Pacific, by the Oxford University Exploration Club. "Some of the islands," said Mrs. Baker, "had never before been explored by white men. The natives were among the most primitive aborigines—a race forgotten by time."

"I used to go out with the women to cultivate the fields in the afternoon. At night I slept with them in their huts. Often there would be as many as eight women to one husband."

"Firearms were unknown on the island, and the men had to hunt with bows and arrows."

ARM IN SLING WITH NEURITIS

A "token of gratification" this woman says she is giving when she writes of her relief from neuritis.

"For twelve months I have had neuritis in my arm, and up till the last two weeks have had to carry it in a sling. Since then I have abandoned my sling, am able to sleep undisturbed, and can perform household duties that previously I would not have done. These benefits I have received from Kruschen Salts. This has all happened in two weeks, and I am optimistic enough to think that in another fortnight I shall have said good-bye to neuritis once and for all. Call this a testimonial if you choose—to me it is token of gratification." (Mrs.) N. E. L. Neuritis is a result of impurities in the blood. And it is impure blood, circulating all over the system and setting up inflammation in the tissues, that causes those excruciating pains. Kruschen Salts can be safely trusted to set the matter right. Because Kruschen contains just what Nature needs to persuade your internal organs back into a healthy, normal condition.

Little Helps For This Week

"For thus saith the high and lofty One that inhabiteth eternity, whose name is Holy: I dwell in high and holy place with him also that is of a humble and contrite spirit, to revive the spirit of the humble, and to revive the heart of the contrite ones." Isaiah 57:15.

Without an end or bound Thy life lies all outspread in light! Our lives feel Thy life all around, Making our weakness strong, our darkness bright; Yet it is neither wilderness or sea, But the calm gladness of a full eternity. —F. W. Faber.

O Truth who art Eternity; And Love who art Truth; And Eternity who art Love; Thou art my God, and Thee do I sigh day and night. When I first knew Thee Thou liftedst me up that I might see there was something for me to see, and that I was not yet such as to see. And Thou streaming forth Thy beams of light upon me most strongly didst beat back the weakness of my sight, and I trembled with love and awe, and I perceived myself to be far off from Thee in the region of unlikeness.—St. Augustine.

Supplied The Material

Toronto Woman Used Gold In Wedding Ring For Filling

A well-known Toronto dentist the other day had a lady who in to have a gold filling put in her tooth. "I'd like to supply the gold," says the lady. "Well, we don't as a rule," he began. "Oh, but I really want to supply this gold," she says winningly. He gives in and goes ahead with the mold. Next day she trots in with a wedding ring.

"It's only 14 carat and we usually use about 22," he explains. But she gets her point. "I'm going to be married tomorrow again," expands the lady. "This is my first wedding ring, and if I have it in my tooth I can still wear it without my second husband knowing anything about it." The dentist looked the yellow metal home.

More Building Operations.

A house is in course of construction on Third avenue for Mr Clarence Anderson. Mr Elmer Anderson has the contract. Mr Anderson's present residence has been let to and will be occupied by Mr Schindler, who is said to be about to return from a four-year sojourn in California. The latter building is located on the Carl Strass plot on Meridian road.

Thursday's Pictures.

The good pictures which Mr Goodman is showing here every Thursday night should be seen to be appreciated. The one last shown, "The White Sister," was the best seen here so far this season. The picture to be shown Thurs June 16, "Take a Chance," promises to be even better. This picture is taken from the musical play of the same name; the leading characters are James Dunn and June Knight, with Charles "Buddy" Rogers.

Hallen News.

(Grand Prairie Tribune, June 7.)
Rev Mr Unterschultz is at present a patient at Grande Prairie hospital, where he was operated on for appendicitis. He is a brother to P Unterschultz of Klondike Trail.
Mr and Mrs Carl Eberhardt visited recently at the home of Mr and Mrs Marley Sherck.
During the 2-day rain of last week there was over 1 inch of rainfall, and there have been numerous local showers since. The resultant benefit to both field crops and gardens is very noticeable, and farmers are in a more optimistic frame of mind.

The Executive Meets.

A meeting of the Executive of the Stony Plain Liberal association was held Monday night at the home of Geo. J. Bryan. Those present were: Wm McLeod, Mrs R E Wood, W H Ball, D Brox, H Miller, J A Willie, A Schaeff, H Tyrell, C Hines, and G J Bryan. The meeting fully discussed the work which was to be carried on during the summer months. It was also decided that 7 or 8 meetings would be held in the outlying parts of the riding. The question of holding a nominating convention was left over until next meeting.

Stony Plain and District

Mr Ed Danuhaber, the well-known painter, is spending the summer at South Edmonton Beach.

Mr Henry Miller of Detroit, arrived here Wednesday on a visit with his parents.

Mrs C Alt and the Misses Catherine and Josie, who had taken up their residence in Calgary in September, have returned to Edmonton, and are now living on the South Side.

A decree absolute in the divorce case of Mary Ulmer against Jacob S Ulmer was granted in the Supreme court on Monday last by Mr Justice Ewing. Geo J. Bryan appeared for the applicant.

The wedding took place on Saturday last at Bruderheim of Emma daughter of Mr and Mrs S Rosnau, to Rene Hennig. The bride is sister to Walter Rosnau, and is well known to members of Stony Plain's Walther League.

Members of the rifle club had a big time at the Range yesterday morning. Prizes were given to the successful best shooters.

An electric spotlight was installed on Saturday over the water tank near the town hall.

The famous Elks' Orchestra has been hired for the dance at Kelly's hall, June 22.

BUTTER AND EGGS WANTED at The Royal Cafe.

Spruce Grove News.

Messrs Wm McLeod and D Brox attended the meeting at Stony Plain Monday night of the executive of the S.P. Liberal association.

Mr Joe Whitelock left on Saturday evening for a visit with friends in Wisconsin and Ontario.

Mr and Mrs O G Wudel were visiting on Sunday at the home of Mr and Mrs Jac Schut.

The Grove's baseballers have been invited to participate in the ball games at Stony Plain on July 24.

The verdant grain fields of Mr J H McLaughlin present a fine spectacle at present; the plots treated with the E B Fertilizer already show a marked contrast to the untreated ones.

Lost Its Pristine Roundness.

Professor—I say, mister, your tubular air container has lost its roundness.

Motorist—I don't quite—
Professor—The cylindrical apparatus which supports your vehicle is no longer inflated.

Motorist—But—
Professor—The elastic fabric surrounding the circular frame whose successive revolutions carry you on in space has not retained its pristine roundness.

Small Boy—Hey, mister, you've got a flat tire.

WE TAKE PLEASURE IN ANNOUNCING

A NEW FORD DEALER

BARTH & ANDERSON,

STONY PLAIN, ALBERTA.

The Ford Motor Company of Canada, Limited, takes pleasure in announcing this new dealership. The appointment is in keeping with its established policy of providing the highest type of representation in each community.

This new Ford dealer is completely equipped to render you competent, capable service on cars and trucks at low cost. Precision equipment has been installed and all mechanics are thoroughly trained. Only genuine Ford parts are used and labor on all ordinary maintenance operations is billed at a standard flat rate.

We invite you to visit this new Ford dealer for service and also to see the display of New Ford V-8 cars. You will be particularly interested in their striking lines and colors, new clear-vision ventilation, and the dual carburetor that gives such exceptional gasoline mileage at all speeds.

FORD MOTOR COMPANY OF CANADA, LIMITED

Hansen's Corners.

Crops in this district are looking fine, and grain growers are hoping for a good price for their product.

The dance here on Friday night was a huge success. Another is billed for Friday the 22d.

The gold diggers have started work again. They took a holiday during the high water.

It is many years, old timers say, since there was such a growth of grass for pasture at so early a time in the year. The season is 2 or 3 weeks ahead of the average.

A CCF organization is now in full swing at the Corners. Big Dan says it will sweep the country the next Dominion elections.

Now that the seeding season is practically over, the Corner's inventor has gone into retirement to work his latest project. The neighbors are wondering what it will be this time he's working on—a non-refillable bottle, a gadget for putting an aeroplane engine in reverse, or just the oldtime perpetual-motion contraption.
